## **MANAGEMENT DISCUSSION AND ANALYSIS**

GTT Data Solutions Limited (formerly known as Cinerad Communications Limited) is a provider of consulting, technology, outsourcing and next-generation digital services, enabling clients to create and execute strategies for their digital transformation and AI journey.

Our purpose is to amplify human potential and create the next opportunity for people, business and communities. We are guided by our value system which motivates our attitudes and actions. Our core values are Client value, Leadership by example, Integrity and transparency, Fairness, and Excellence.

### **Industry structure and developments**

The IT services, digital transformation, and training services industry is evolving rapidly with increasing demand for AI, cloud computing, cybersecurity, data analytics, automation, and upskilling initiatives. Businesses across sectors are accelerating their digital journeys post-COVID, with a strong focus on resilience, remote working capabilities, customer-centric innovation, and equipping their workforce with the skills required for emerging technologies.

India continues to be a key hub for global IT services, digital innovation, and talent development, supported by a robust talent pool, a growing ecosystem of training and skilling providers, and improving regulatory frameworks. However, macroeconomic uncertainties, geopolitical issues, and technology shifts are influencing client spending patterns, with organizations increasingly investing in both technology adoption and employee capability-building to stay competitive.

Enterprises are moving from experimentation to scaled deployment of AI — especially domain-specific copilots, agentic automation, and retrieval-augmented applications — driving demand for data engineering, model integration, and governance. Cloud modernization continues, but with a sharper focus on cost optimization and FinOps, private cloud or hybrid architectures for sensitive workloads, and platform engineering to boost developer productivity. Cybersecurity spending remains resilient, with identity, data protection, and secure-by-design AI models becoming board priorities. Talent models are shifting toward **AI + human** collaboration, where workforce upskilling and change management are as critical as technology itself. In India, the digital public infrastructure (DPI) stack, growing startup ecosystem, and tier-2/3 talent pools are catalyzing IT services growth and distributed delivery footprints.

### **GTT's operating model: Dual Intelligence (AI + HI)**

We are pioneering **Dual Intelligence**—the deliberate combination of **Artificial Intelligence (AI)** with **Human Intelligence (HI)** across two synergistic divisions:

1. **AI Solutions & Digital Engineering (AI division)** – Consulting & digital transformation, data engineering, analytics, enterprise AI, DevOps/ITSM, ERP/CRM, and managed/outsourcing services. Solutions focus on orchestrating data, integrating AI models and copilots, building RAG/agentic workflows, and embedding AI safely and responsibly into business processes.
2. **Human Intelligence – Training & Workforce Development (HI division)** – Programs that ready organizations for AI-era work: AI model development and data science skills; cloud, software dev/test; ERP (with a strategic emphasis on SAP); human-digital collaboration, leadership for the AI era, culture change, and dual-intelligence-ready talent initiatives.

Return on Investment	Interest (Finance Income)	Average Investment				

**Notes:**

1. Total debts consists of borrowings and lease liabilities.
2. Earning available for debt services=profit for the year + depreciation, amortization and impairment + finance cost + provision for doubtful debts + share based payment to employees + non cash charges.
3. Debt service = Interest + payment for lease liabilities + principal repayments.
4. Credit sales = Total Revenue + opening contract assets - closing contract assets - opening deferred revenue + closing deferred revenue.
5. Earnings before interest and taxes = profit before tax + finance cost - other income
6. Capital Employed = Average tangible net worth + Total debt + Deferred tax.
7. Average is calculated on the basis of opening and closing balances.

**Reasons:**

1. The variance is primarily due to a significant increase in current liabilities, driven by recognition of short-term lease liabilities under Ind AS 116, increased short-term borrowings, higher trade payables, outstanding statutory dues, and customer advances.
2. The debt-equity ratio for the current year is 0.62, whereas it was not applicable in the previous year due to the absence of debt. The variance is due to the introduction of external debt in the current year through new borrowings taken to support business expansion and working capital requirements.
3. The DSCR (Debt Service Coverage Ratio) for the current year is -0.31, while no ratio was reported in the previous year due to the absence of debt. The variance is due to the introduction of new borrowings in the current year, leading to interest and principal repayment obligations, while operating cash flows were insufficient to meet these commitments.
4. The variance is due to a substantial increase in net loss during the year and a simultaneous rise in shareholders' funds, which together led to a deeper negative return on equity.

5. The variance is due to the introduction of credit sales in the current year, resulting in the recognition of trade receivables and the emergence of the Trade Receivables Turnover Ratio.
6. The variance is on account of trade payables being Nil in the previous year. In the current year, normal credit balances with vendors exist, resulting in a meaningful ratio.
7. The variance is due to a significant increase in current liabilities—primarily from lease liabilities, short-term borrowings, and customer advances—exceeding the growth in current assets, resulting in negative net working capital.
8. The variance is due to higher revenue and reduced expenses, resulting in a lower net loss margin compared to the previous year.
9. The variance is due to an increase in net loss during the current year, which led to a more negative ratio compared to the previous year.

- **Discussion on financial performance with respect to operational performance.**

### INDEPENDENT AUDITOR'S REPORT

**To the Members of GTT DATA SOLUTION Limited**  
(Formerly known as Cinerad Communications Limited)

#### **Report on the Audit of the Standalone Financial Statements**

##### **Opinion**

We have audited the accompanying standalone financial statements of **GTT DATA SOLUTION LTD.** (Formerly known as Cinerad Communications Limited) ("the Company"), which comprise the Balance Sheet as at March 31, 2025, and the Statement of Profit and Loss, including Other Comprehensive Income, Statement of Changes in Equity and Statement of Cash Flows for the year then ended, and notes to the standalone financial statements, including material accounting policy information and other explanatory information (hereinafter referred to as the "stand alone financial statements").

In our opinion and to the best of our information and according to the explanations given to us, the aforesaid standalone financial statements give the information required by the Companies Act, 2013 ("the Act") in the manner so required and give a true and fair view in conformity with the Indian Accounting Standards prescribed under section 133 of the Act read with Companies (Indian Accounting Standards) Rules, 2015, as amended ("Ind AS") and other accounting principles generally accepted in India, of the state of affairs of the Company as at March 31, 2025, and loss (including other comprehensive income), changes in equity and its cashflows for the year ended on that date.

##### **Basis for Opinion**

We conducted our audit of the standalone financial statements in accordance with the Standards on Auditing (SAs) specified under section 143(10) of the Act. Our responsibilities under those Standards are further described in the 'Auditor's Responsibilities for the Audit of the Standalone Financial Statements' section of our report. We are independent of the Company in accordance with the Code of Ethics issued by the Institute of Chartered Accountants of India ("ICAI") together with the ethical requirements that are relevant to our audit of the standalone financial statements under the provisions of the Act and the Rules thereunder, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the Code of Ethics. We believe that the audit evidence obtained by us is sufficient and appropriate to provide a basis for our opinion.

##### **Key Audit Matters**

Key audit matters are those matters that, in our professional judgement, were of most significance in our audit of the standalone financial statements for the year ended March 31, 2025. These matters were addressed in the context of our audit of the standalone financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters. We have determined the matters described below to be the key audit matters to be communicated in our report.

a. **Revenue recognition – fixed Price Contract**

The Company engages in fixed price contracts with its customers wherein revenue from such contracts is recognized over time. The Company uses input method to recognise revenue, as it represents efforts expended towards satisfying a performance obligation relative to the total expected efforts or inputs to satisfy the performance obligation.

Contract estimates are formed by the Company considering the following:

- i. Application of the revenue recognition accounting standard is complex. It involves a number of key judgements and estimates. One of the key estimates is total cost-to completion of these contracts. It is used to determine the percentage of completion of the relevant performance obligation.
- ii. There is judgement involved in identification of distinct performance obligations and determination of transaction price for such performance obligations.
- iii. These contracts may involve onerous obligations on the Company requiring critical estimates to be made.
- iv. Contracts are subject to modification to account for changes in contract specification and requirements.

Considering the significant estimate involved in recognition of revenue based on percentage of completion method in respect of fixed price contracts, we have considered this as key audit matter.

How the matter was addressed in our audit.

- i. Obtained an understanding of the systems, processes and controls implemented by the Company and evaluating the design and implementation of internal controls for measuring and recording revenue and the associated contract assets and unearned revenue.
- ii. Tested the design and operating effectiveness of key IT controls over IT environment in which the business systems operate. This includes access controls, program change controls, program development controls and IT operation controls.
  - a. For selected samples of contracts, we inspected the terms of the contract and assessed the revenue recognized in accordance with Ind AS by;
    - Evaluating the identification of performance obligations.
    - Agreeing the transaction price to the underlying contracts.
    - Inspecting the approval of the estimates of cost to complete.
    - Assessing the work in progress (contract assets) on the balance sheet date by inspecting the underlying invoices and signed agreements on a sample basis to identify possible delays in achieving milestones. Those may require change in estimated costs to complete the remaining performance obligations.
  - b. Assessment of Going Concern.

The Company has incurred significant losses during the year ended 31<sup>st</sup> march 2025 and its current liabilities exceed its current assets by ₹ 1526.76 lakhs. These conditions indicate the existence of a material uncertainty that may cast significant doubt on the Company's ability to continue as a going concern. Management has prepared the financial statements on a going concern basis, based on their assessment of future cash flows and available sources of finance.

How the matter was addressed in our audit.

- Evaluating the reasonableness of management's cash flow forecasts and the assumptions used.
- Assessing the Company's ability to realise assets and discharge liabilities in the normal course of business;
- Reviewing financing and support arrangements; and
- Considering the adequacy of disclosures regarding going concern in the financial statements.

Based on our procedures, we found that the use of the going concern assumption by management was appropriate and the related disclosures were sufficient.

Our opinion is not modified in respect of this matter.

### **Emphasis of Matter**

We draw attention to the following matters in the Notes to the Standalone Financial Results:

## **ANNEXURE 'A' TO THE INDEPENDENT AUDITOR'S REPORT**

### **Auditor's Responsibilities for the Audit of the Standalone Financial Statements.**

As part of an audit in accordance with SAs, we exercise professional judgment and maintain professional scepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the standalone financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances. Under section 143(3) (i) of the Act, we are also responsible for expressing our opinion on whether the Company has adequate internal financial controls with reference to standalone financial statements in place and the operating effectiveness of such controls.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management and Board of Directors.
- Conclude on the appropriateness of management and Board of Director's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the standalone financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the standalone financial statements, including the disclosures, and whether the standalone financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the standalone financial statements for the year ended March 31, 2025, and are therefore, the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

## **ANNEXURE “C” TO THE INDEPENDENT AUDITOR’S REPORT**

[Referred to in paragraph 2(f) under ‘Report on Other Legal and Regulatory Requirements’ in the Independent Auditors’ Report of even date to the Members of **GTT DATA SOLUTION** Limited (Formerly known as Cinerad Communications Limited) on the Financial Statements for the year ended March 31, 2025.

Report on the Internal Financial Controls under Clause (i) of Sub-section 3 of Section 143 of the Companies Act, 2013 (“the Act”).

We have audited the internal financial controls with reference to standalone financial statements of **GTT DATA SOLUTION LTD** (Formerly known as Cinerad Communications Limited) (“the Company”) as of March 31, 2025 in conjunction with our audit of the standalone financial statements of the Company for the year ended on that date.

### **Opinion**

In our opinion, the Company has, in all material respects, an adequate internal financial control with reference to standalone financial statements and such internal financial controls with reference to standalone financial statements were operating effectively as at March 31, 2025, based on the internal control with reference to standalone financial statements criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting (the “Guidance Note”) issued by the Institute of Chartered Accountants of India (“ICAI”).

### **Managements and Board of Director’s Responsibility for Internal Financial Controls**

The Company’s Management and the Board of Directors are responsible for establishing and maintaining internal financial controls based on the internal control with reference to standalone financial statements criteria established by the Company considering the essential components of internal control stated in the Guidance Note issued by ICAI. These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to Company’s policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Act.

### **Auditors’ Responsibility**

Our responsibility is to express an opinion on the Company's internal financial controls with reference to standalone financial statements based on our audit. We conducted our audit in accordance with the Guidance Note and the Standards on Auditing, issued by ICAI and deemed to be prescribed under section 143(10) of the Act, to the extent applicable to an audit of internal financial controls. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls with reference to standalone financial statements was established and maintained and if such controls operated effectively in all material respects.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls with reference to standalone financial statements and their operating effectiveness. Our audit of internal financial controls with reference to standalone financial statements included obtaining an understanding of internal financial controls with reference to standalone financial statements, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor’s judgement, including the assessment of the risks of material misstatement of the standalone financial statements, whether due to fraud or error.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Company’s internal financial controls with reference to standalone financial statements.

### **Meaning of Internal Financial Controls With reference to Standalone Financial Statements.**

A Company's internal financial control with reference to standalone financial statements is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of standalone financial statements for external purposes in accordance with generally accepted accounting principles. A Company's internal financial control with reference to standalone financial statements includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the Company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of standalone financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the Company are being made only in accordance with authorizations of management and directors of the Company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the Company's assets that could have a material effect on the standalone financial statements.

### **Inherent Limitations of Internal Financial Controls With reference to Standalone financial statements.**

Because of the inherent limitations of internal financial controls with reference to standalone financial statements, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls with reference to standalone financial statements to future periods are subject to the risk that the internal financial control with reference to standalone financial statements may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

### **Note34: Estimates and Assumptions**

The preparation of the Company's financial statements requires management to make estimates and assumptions that affect the reported amounts of revenues, expenses, assets and liabilities, and the accompanying disclosures, and the disclosure of contingent liabilities. Uncertainty about these assumptions and estimates could result in outcomes that require a material adjustment to the carrying amount of assets or liabilities affected in future periods. The key assumptions concerning the future and other key sources of estimation uncertainty at the reporting date, that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year, are described below. The Company based its assumptions and estimates on parameters available when the financial statements were prepared. Existing circumstances and assumptions about future developments, however, may change due to market changes or circumstances arising that are beyond the control of the Company. Such changes will be reflected in the assumptions when they occur.

### **Impairment of non-financial assets**

"During the year, the Company acquired 100% Global talent track Private limited Subsidiary/Business on July & September Months for a consideration of ₹ 1000000000. The acquisition has been accounted for as a business combination in accordance with Ind AS 103 – Business Combinations and Ind as 110, The assets and liabilities of the acquired company are currently held for operational integration and have not been disposed of as at the reporting date. The management is in the process of assessing the timing and manner of disposal if applicable. Impairment exists when the carrying value of an asset or Cash Generating Unit (CGU) exceeds its recoverable amount, which is the higher of its fair value less costs of disposal and its value in use. The fair value less costs of disposal calculation is based on available data from binding sales transactions, conducted at arm's length, for similar assets or observable market prices less incremental costs for disposing of the asset. The value in use calculation is based on a DCF model. The cash flows are derived from the budget for the next five years and do not include restructuring activities that the Company is not yet committed to or significant future investments that will enhance the asset's performance of the CGU being tested. The recoverable amounts sensitive to the discount rate used for the DCF model as well as the expected future cash-inflows and the growth rate used for extrapolation purposes.

Level 1: Level 1 hierarchy includes financial instruments measured using quoted prices. This includes listed equity instruments, traded bonds and mutual funds that have quoted price. The fair value of all equity instruments (including bonds) which are traded in the stock exchanges is valued using the closing price as at the reporting period. The mutual funds are valued using the closing NAV.

Level 2: The fair value of financial instruments that are not traded in an active market (for example, traded bonds, over-the-counter derivatives) is determined using valuation techniques which maximize the use of observable market data and rely as little as possible on entity-specific estimates. If all significant inputs required to fair value an instrument are observable, the instrument is included in level 2.

Level 3: If one or more of the significant inputs is not based on observable market data, the instrument is included in level 3. This is the case for unlisted equity securities, contingent consideration and indemnification asset included in level 3.

The Company does not have any financial assets or liabilities which are required to be measured at fair value on a recurring basis. Accordingly, no disclosures relating to fair value hierarchy are applicable.

## Notes forming part of the Standalone Financial Statements

### 1. Corporate information

The Company is a listed public company incorporated and providing a set of services to Manufacturing, Industrial products, Medical Devices Technology, to help them develop and build products, processes and infrastructure required to deliver products and services.

### 2. Material accounting policies

#### a) Basis of accounting

Prepared on the historical cost basis, except for fair values or at amortized cost at the end of each reporting period, as explained in the accounting policies.

Fair value is the price that would be received on sale of an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. Fair value measurements are categorized as below, based on the degree to which the inputs to the fair value measurements are observable and the significance of the inputs to the fair value measurement in its entirety:

- Level 1: quoted prices (unadjusted) in active markets for identical assets or liabilities that the Company can access at measurement date;
- Level 2: inputs other than quoted prices included in level 1, that are observable for the asset or liability, either directly or indirectly; and
- Level 3: inputs for the asset or liability that are not based on observable market data (unobservable inputs).

Above levels of fair value hierarchy are applied consistently and generally, there are no transfers between the levels of the fair value hierarchy unless the circumstances change.

Accounting policies have been consistently applied except where a new accounting standard is initially adopted or a revision to an existing accounting standard requires a change in the accounting policy.

An asset is classified as current when it is:

- Expected to be realized or intended to be sold or consumed in normal operating cycle;
- Held primarily for the purpose of trading;
- Expected to be realized within twelve months after the reporting period; or
- Cash or cash equivalent unless restricted from being exchanged or used to settle a liability for at least twelve months after the reporting period.

A liability is classified as current when:

- It is expected to be settled in normal operating cycle;
- It is held primarily for the purpose of trading;
- It is due to be settled within twelve months after the reporting period; or
- There is no unconditional right to defer the settlement of the liability for at least twelve months after the reporting period. Terms of a liability that could, at the option of the counterparty, result in its settlement by the issue of equity instruments do not affect its classification.

The operating cycle is the time between the acquisition of assets for processing and their realization in cash and cash equivalents.

**b) Statement of compliance and basis of preparation**

Prepared in accordance with the provisions of the Companies Act, 2013 ("the Act") and the Indian Accounting Standards ("Ind AS") notified under the Companies (Indian Accounting Standards) Rules, 2015 and amendments thereof issued by Ministry of Corporate Affairs. Accounting policies, methods and principles adopted are consistent with those followed in the previous financial year. All accounting pronouncements issued by the Institute of Chartered Accountants of India (ICAI) are also applied except where compliance with other statutory promulgations require different treatment. The financial statements have been approved for issue by the Board of Directors.

The standalone statement of profit and loss are prepared in the format prescribed in schedule III to the Act. The cash flow statement has been prepared under indirect method and presented as per the requirements of Ind AS 7.

The disclosure requirements with respect to items in the balance sheet and statement of profit and loss, as prescribed in schedule III to the Act, are presented by way of notes forming part of accounts along with the other notes required to be disclosed under the notified Ind AS and the SEBI regulations. All amounts in the financial statements are presented in Indian Rupees in million [1 million = 10 lacs] except per share data and as otherwise stated.

**c) Use of estimates and judgements**

The preparation of these standalone financial statements in conformity with the recognition and measurement principles of Ind AS requires the management of the Company to make estimates and assumptions that affect the reported balances of assets and liabilities, disclosures relating to contingent liabilities as at the date of the financial statements and the reported amounts of income and expense for the periods presented. Uncertainty about these assumptions and estimates could result in outcomes that require a material adjustment to the carrying amount of assets or liabilities affected in future periods.

Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognized in the period in which the estimates are revised and future periods are affected.

Key sources of estimation of uncertainty at the date of the financial statements, which may cause a material adjustment to the carrying amounts of assets and liabilities within the next financial year, are in respect of useful lives of property, plant and equipment, valuation of deferred tax assets, provisions and contingent liabilities, impairment testing, revenue recognition and employee benefits.

The areas involving critical judgments are as follows:

- i) **Revenue recognition:** The Company applies judgement to determine whether each service promised to a customer is capable of being distinct, and is distinct in the context of the contract, if not, the promised services are combined and accounted as one performance obligation. The Company uses the percentage of completion method using the input (cost expended) method to measure progress towards completion in respect of fixed price contracts. Percentage of completion method accounting relies on estimates of total expected contract revenue and costs. This method is followed when reasonably dependable estimates of the revenues and costs applicable to various elements of the contract can be made. Key factors that are reviewed in estimating the future costs to complete include estimates of future labor costs and productivity efficiencies. Because the financial reporting of these contracts depends on estimates that are assessed continually during the term of these contracts, revenue recognized, profit and timing of revenue for remaining performance obligations are subject to revisions as the contract progresses to completion. When estimates indicate that a loss will be incurred, the loss is provided for in the period in which the loss becomes probable. Volume discounts are recorded as a reduction of revenue. When the amount of discount varies with the levels of revenue, volume discount is recorded based on estimate of future revenue from the customer.
- ii) **Income taxes:** The major tax jurisdictions for the Company are India and the United States of America. Significant judgments are involved in determining the provision for income taxes including judgment on whether tax positions are probable of being sustained in tax assessments. A tax assessment can involve complex issues, which can only be resolved over extended time periods.
- iii) **Defined benefit plans:** The cost of the defined benefit plans and the present value of the defined benefit obligation are based on actuarial valuation using the projected unit credit method. An actuarial valuation involves making various assumptions that may differ from actual developments in the future. These include the determination of the discount rate, future salary increases, attrition rate and mortality rates. Due to the complexities involved in the valuation and its long-term nature, a defined benefit obligation is highly sensitive to changes in these assumptions. All assumptions are reviewed at each reporting date.
- iv) **Expected credit losses on financial assets:**

The impairment provisions of financial assets are based on assumptions about risk of default and expected timing of collection. The Company uses judgment in making these assumptions and selecting the inputs to the expected credit loss calculation based on the Company's history of collections, customer's creditworthiness, existing market conditions as well as forward looking estimates at the end of each reporting period.

**d) Functional and presentation currency**

Items included in the financial statements of the entity are measured using the currency of the primary economic environment in which the entity operates ('the functional currency'). The financial statements are presented in Indian rupees, which is the functional currency of the Company.

**e) Revenue recognition**

Revenue is recognized upon transfer of control of promised services to customers in an amount that reflects the consideration which the Company expects to receive in exchange for those services.

Revenues from customer contracts are considered for recognition and measurement when the contract has been approved by the parties to the contract, the parties to the contract are committed to perform their respective obligations, each party's rights and payment terms regarding the services to be transferred are identified, the contract has commercial substance and it is probable that the entity will collect the consideration to which it is entitled to in exchange for the services that will be rendered.

The company assesses the services promised in a contract and identifies distinct performance obligations in the contract.

Revenue is measured based on the consideration specified in a contract with a customer and excludes amounts collected on behalf of third parties.

The company's contracts may include variable consideration including rebates, volume discounts and penalties. The Company includes variable consideration as part of transaction price when there is a basis to reasonably estimate the amount of the variable consideration and when it is probable that a significant reversal of cumulative revenue recognized will not occur when the uncertainty associated with the variable consideration is resolved.

The Company allocates the transaction price to each distinct performance obligation based on the relative standalone selling price.

Revenue from contracts which are on time and material basis are recognized when services are rendered, and related costs are incurred.

Revenue from fixed price contracts where the performance obligations are satisfied over time and where there is no uncertainty as to measurement or collectability of consideration, is recognized as per the percentage of completion method. The percentage of completion method requires the company to estimate the services performed to date as a proportion of the total services to be performed. Efforts or costs expended (input method) has been used to measure progress towards completion as there is a direct relationship between input and productivity.

Contract assets are recognized when there is excess of revenue earned over billings on contracts.

Contract assets are classified as unbilled receivables (only act of invoicing is pending) when there is unconditional right to receive cash, and only passage of time is required, as per contractual terms.

Unearned revenue ("contract liability") arises when there are billing in excess of revenue.

**f) other income**

Interest income is accrued on a time basis by reference to the principal outstanding and the effective interest rate applicable.

Dividend income is accounted for when the right to receive is established and it is probable that the economic benefits associated with the dividend will flow to the Company and the amount of dividend can be measured reliably.

**g) Employee benefits**

- (i) Short term employee benefits: All employee benefits falling due wholly within twelve months of rendering the service are classified as short-term employee benefits. The benefits like salaries, wages, and short term compensated absences and performance incentives are recognized in the period in which the employee renders the related service.
- (ii) Post-employment benefits:
  - The Company's contribution to state governed provident fund scheme, employee state insurance scheme and employee pension scheme are classified as defined contribution plans. The contribution paid/payable under the schemes is recognized during the period in which the employee renders the related service.
  - The employee provident fund schemes are managed by board of trustees established by the Company. The employee's gratuity fund scheme and the Company's pension schemes are managed by Life Insurance Corporation of India (LIC). These are classified as defined benefit plans. The present value of the obligation under such defined benefit plans is determined based on actuarial valuation using the Projected Unit Credit Method, which recognizes each period of service as giving rise to additional unit of employee benefit entitlement and measures each unit separately to build up the final obligation.
  - The obligation is measured at the present value of the estimated future cash flows using a discount rate based on the market yield on government bonds, having maturity periods approximating to the terms of related obligations.
  - Remeasurements, comprising of actuarial gains and losses, the effect of the asset ceiling, excluding amounts included in net interest on the net defined benefit liability and the return on plan assets (excluding amounts included in net interest on the net defined benefit liability), are recognized immediately in the balance sheet with a corresponding debit or credit to retained earnings through other comprehensive income in the period in which they occur.

- The net interest cost is calculated by applying the discount rate to the net balance of the defined benefit obligation and the fair value of plan assets. This cost is included in employee benefit expense in the statement of profit and loss.
  - In case of funded plans, the fair value of the plan assets is reduced from the gross obligation under the defined benefit plans to recognize the obligation on a net basis.
  - Gains or losses on the curtailment or settlement of any defined benefit plan are recognized when the curtailment or settlement occurs. Past service cost is recognized as expense on a straight-line basis over the average period until the benefits become vested.
- (iii) **Compensated absences:** The Company treats accumulated leave expected to be carried forward beyond twelve months, as long-term employee benefit for measurement purposes. Compensated absences are provided based on the actuarial valuation using the projected unit credit method at the reporting date. Actuarial gains/losses are immediately taken to the statement of profit and loss. The Company presents the entire leave as a current liability in the balance sheet if the entity does not have an unconditional right to defer the settlement for at least twelve months after the reporting period.

#### **h) Property, plant and equipment**

- a) **Recognition & Measurement:** Property, plant and equipment are recognized when it is probable that future economic benefits associated with the item will flow to the company and the cost of the item can be measured reliably.

Property, plant and equipment are stated at cost net of tax/duty credits availed, if any, less accumulated depreciation and cumulative impairment, if any.

Property, plant and equipment not ready for intended use on the date of balance sheet are disclosed under capital work-in-progress.

- b) **Depreciation:** Depreciation is provided for property, plant and equipment so as to expense the cost over their estimated useful lives, based on evaluation, using straight-line method. The estimated useful lives and residual value are reviewed at the end of each reporting period, with the effect of any changes in estimate accounted for on a prospective basis. Depreciation is charged on pro-rata basis for property, plant and equipment purchased/sold during the year.

- (i) Estimated useful life of following assets is as under:

Sr. No.	Category of asset class*	Useful life as per schedule	Useful life adopted (in years)
		II (in years)	
1	Plant and equipment	15	12
2	Office equipment	15	12
5	Computers	3-6	3 – 6
6	Vehicles	5	>1 – 4
8	Furniture and Fixtures	10	10
9	Electrical Installations	10	10

Based on technical evaluation, the management believes that the useful lives as given above best represents the period over which the management expects to use these assets.  
PPE is derecognized upon disposal or when no future economic benefits are expected from its use or disposal. Any gain or loss arising on derecognition is recognized in the Statement of Profit and Loss.

**i) Intangible assets and amortization**

Intangible assets are recognized when it is probable that the future economic benefits that are attributable to the asset will flow to the enterprise and the cost of the asset can be measured reliably. Intangible assets are measured at cost (net of tax/duty credits availed, if any) or fair value as of the date of acquisition, as applicable, less accumulated amortization and cumulative impairment. The estimated useful life of intangible assets (software) is are amortized on a straight-line basis as per the table below:

<b>Asset class</b>	<b>Useful life (years)</b>
Specialized software	3 – 6
Technical knowhow	4
Customer contracts and relationships	4
Tradename	1

**j) Goodwill**

Goodwill represents the cost of acquired business as established at the date of acquisition of the business in excess of the acquirer's interest in the net fair value of the identifiable assets, liabilities and contingent liabilities less accumulated impairment losses, if any. Goodwill is tested for impairment annually or when events or circumstances indicate that the implied fair value of goodwill is less than it carrying amount.

**k) Impairment of assets**

i) **Trade receivables:** The Company uses an expected credit loss Model to assess the impairment loss. The Company uses a provision matrix to compute the expected credit loss allowance for trade receivables. The provision matrix takes into account available external and internal credit risk factors and the Company's historical experience with customers.

ii) **Tangible and intangible assets:** Property, plant and equipment and intangible assets (other than goodwill) are evaluated for recoverability whenever there is any indication that their carrying amounts may not be recoverable. If any such indication exists, the recoverable amount (i.e. higher of the fair value less cost to sell and the value-in-use) is determined on an individual asset basis unless the asset does not generate cash flows that are largely independent of those from other assets. In such cases, the recoverable amount is determined for the cash generating unit (CGU) to which the asset belongs.

If the recoverable amount of an asset (or CGU) is estimated to be less than it carrying amount, the carrying amount of the asset (or CGU) is reduced to its recoverable amount. An impairment loss is recognized in the statement of profit and loss.

Impairment is determined for goodwill by assessing the recoverable amount of each CGU (or group of CGUs) to which the goodwill relates. When the recoverable amount of the CGU is less than it's carrying amount, an impairment loss is recognized. Impairment losses relating to goodwill cannot be reversed in future periods.

**l) Leases**

The Company assesses at contract inception whether a contract is, or contains, a lease. That is, if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration.

**Company as a lessee:** The Company applies a single recognition and measurement approach for all leases, except for short-term leases and leases of low-value assets. The Company recognizes lease liabilities to make lease payments and right-of-use assets representing its right to use the underlying assets.

**Right-of-use assets:** The Company recognizes right-of-use assets at the commencement date of the lease (i.e., the date the underlying asset is available for use). Right-of-use assets are measured at cost, less any accumulated depreciation and impairment losses, and adjusted for any remeasurement of lease liabilities. The cost of right-of-use assets includes the amount of lease liabilities recognized, initial direct costs incurred, and lease payments made at or before the commencement date less any lease incentives received. Right-of-use assets are depreciated on a straight-line method from the commencement date over the lease term.

**Lease Liabilities:** At the commencement date of the lease, the Company recognizes lease liabilities measured at the present value of lease payments to be made over the lease term. The lease payments include fixed payments (including in substance fixed payments) less any lease incentives receivable, variable lease payments that depend on an index or a rate, and amounts expected to be paid under residual value guarantees. The lease payments also include the exercise price of a purchase option reasonably certain to be exercised by the Company and payments of penalties for terminating the lease, if the lease term reflects the Company exercising the option to terminate.

**Short-term leases and leases of low-value assets:** The company has elected not to recognize right-of-use assets and lease liabilities for leases of low value assets and short-term leases. The Company recognizes the lease payments as an operating expense on a straight-line basis over the term of the lease.

**m) financial instruments**

Financial assets and liabilities are recognized when the Company becomes party to a contract that give rise to a financial asset of one entity and a financial liability or equity instrument of another entity.

Financial assets and liabilities are initially measured at fair value. Transaction costs that are directly attributable to the acquisition or issue of financial assets and financial liabilities (other than financial assets and financial liabilities at fair value through profit or loss) are added to or deducted from the fair value of the financial assets or financial liabilities, as appropriate, on initial recognition.

**Financial assets:**

a. **financial assets at amortized cost:** Financial assets are subsequently measured at amortized cost if these financial assets are held within a business model whose objective is to hold these assets in order to collect contractual cash flows and the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

Financial assets at amortized cost are represented by trade receivables, cash and cash equivalents, employee and other advances and eligible current and non-current assets.

b. **Financial assets at fair value through other comprehensive income:** Financial assets are measured at fair value through other comprehensive income if these financial assets are held within a business model whose objective is achieved by both collecting contractual cash flows and selling financial assets and the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

c. **financial assets at fair value through profit or loss:** Financial assets are measured at fair value through profit or loss unless it is measured at amortized cost or at fair value through other comprehensive income on initial recognition.

The transaction costs directly attributable to the acquisition of financial assets and liabilities at fair value through profit or loss are immediately recognized in profit or loss.

**Financial liabilities:** Financial liabilities are initially recognized at fair value, and subsequently carried at amortized cost using the effective interest method.

**Derivative financial instruments and hedge accounting:** The Company designates foreign exchange forward contracts as hedge instruments in respect of foreign exchange risks. These hedges are accounted for as cash flow hedges.

The Company uses hedging instruments that are governed by the policies of the Company which are approved by the Board of Directors, which provide written principles on the use of such financial derivatives consistent with the risk management strategy of the Company.

The hedge instruments are designated and documented as hedges at the inception of the contract. The effectiveness of hedge instruments to reduce the risk associated with the exposure being hedged is assessed and measured at inception and on an ongoing basis. The ineffective portion of designated hedges is recognized immediately in the statement of profit and loss.

The effective portion of change in the fair value of the designated hedging instrument is recognized in the other comprehensive income and accumulated under the heading cash flow hedge reserve.

Hedge accounting is discontinued when the hedging instrument expires or is sold, terminated or exercised, or no longer qualifies for hedge accounting. Any gain or loss recognized in other comprehensive income and accumulated in equity till that time it remains and is recognized in statement of profit and loss when the forecasted transaction ultimately affects the profit or loss. When a forecasted transaction is no longer expected to occur, the cumulative gain or loss accumulated in equity is transferred to the statement of profit and loss.

**De-recognition:** Financial assets are derecognized when all the rights to receive cash flows from the financial assets expire or transferred without receipt of consideration. Financial liabilities are derecognized from the Company's balance sheet when the obligation specified in the contract is discharged or cancelled or expired.

**n) Cash and cash equivalents**

Cash and cash equivalents includes cash on hand, balances with banks, other short-term, highly liquid investments with original maturities of three months or less that are readily convertible to known amounts of cash and which are subject to an insignificant risk of changes in value.

**o) Employee stock option scheme**

In respect of stock options granted pursuant to the Company's stock options scheme, the excess of fair value of the option over the exercise price is treated as discount and accounted as employee compensation expense each year is arrived at based on the number of grants expected to vest. The total expenses recorded each year is arrived at based on the number of grants that have vested during the year. At the end of each period, the entity revises its estimates of the number of options that are expected to vest based on the service conditions. When the share-based award vests, the cumulative discount recognized as expense in respect of such grant is transferred to securities premium by crediting the ESOP Outstanding Reserve.

**p) foreign currencies**

Income and expenses in foreign currencies are recorded at exchange rates prevailing on the date of the transaction. Foreign currency monetary assets and liabilities are translated at the exchange rate prevailing on the balance sheet date and exchange gains and losses arising on settlement and restatement are recognized in the statement of profit and loss. The Company's functional currency is Indian Rupees. Non-monetary assets and liabilities that are measured in terms of historical cost in foreign currencies are not retranslated.

**q) Income tax**

Income tax expense comprises current tax expense and the net change in the deferred tax asset or liability during the year. Current and deferred tax are recognized in profit or loss, except when they relate to items that are recognized in other comprehensive income or directly in equity, in which case, the current and deferred tax are also recognized in other comprehensive income or directly in equity, respectively.

The current income tax expense includes income taxes payable by the Company and its branches in India and overseas. The current income tax payable by the Company in India is Indian income tax payable for their worldwide income after taking credit for tax relief available for export operations in Special Economic Zones (SEZs).

Current income tax payable by overseas branches of the Company is computed in accordance with the tax laws applicable in the jurisdiction in which the respective branch operates. The taxes paid are generally available for set off against the Indian income tax liability of the Company's worldwide income.

Advance taxes and provisions for current income taxes are presented in the balance sheet after off-setting advance tax paid and income tax provision arising in the same tax jurisdiction and where the relevant tax paying units intends to settle the asset and liability on a net basis.

Deferred income tax is recognized using the balance sheet approach. Deferred income tax assets and liabilities are recognized for deductible and taxable temporary differences arising between the tax base of assets and liabilities and their carrying amount, except when the deferred income tax arises from the initial recognition of an asset or liability in a transaction that is not a business combination and affects neither accounting nor taxable profit or loss at the time of the transaction.

Deferred income tax asset is recognized to the extent that it is probable that taxable profit will be available against which the deductible temporary differences and the carry forward of unused tax credits and unused tax losses can be utilized.

The carrying amount of deferred income tax assets is reviewed at each reporting date and reduced to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the deferred income tax asset to be utilized.

Deferred tax assets and liabilities are measured using substantively enacted tax rates expected to apply to taxable income in the years in which the temporary differences are expected to be received or settled.

For operations carried out in SEZs, deferred tax assets or liabilities, if any, have been established for the tax consequences of those temporary differences between the carrying values of assets and liabilities and their respective tax bases that reverse after the tax holiday ends.

Deferred tax assets and liabilities are offset when they relate to income taxes levied by the same taxation authority and the relevant entity intends to settle its current tax assets and liabilities on a net basis.

Deferred tax assets include Minimum Alternative Tax (MAT) paid in accordance with the tax laws in India, which is likely to give future economic benefits in the form of availability of set off against future income tax liability. Accordingly, MAT is recognized as deferred tax asset in the balance sheet when the asset can be measured reliably and it is probable that the future economic benefit associated with the asset will be realized.

The Company recognizes interest levied related to income tax assessments in interest expenses.

**r) Provisions, contingent liabilities and contingent assets**

Provisions are recognized for liabilities that can be measured only by using a substantial degree of estimation, if: i) The Company has a present obligation as a result of a past event; ii) A probable outflow of resources is expected to settle the obligation; and iii) The amount of the obligation can be reliably estimated

Contingent liability is disclosed in the case of: i) A present obligation arising from a past event when it is not probable that an outflow of resources will be required to settle the obligation; or ii) A possible obligation unless the probability of outflow of resources is remote

Contingent assets are neither recognized nor disclosed.

Provisions, contingent liabilities and contingent assets are reviewed at each balance sheet date.

**s) Statement of cash flows**

Cash flows are reported using the indirect method, whereby profit/(loss) before extraordinary items and tax is adjusted for the effects of transactions of non-cash nature and any deferrals or accruals of past or future cash receipts or payments. The cash flows from operating, investing and financing activities of the Company are segregated based on the available information.

**t) Investment in subsidiaries**

Investments in subsidiaries are measured at cost as per Ind AS 27 - Separate Financial Statements.

**u) Earnings per equity share**

Basic earnings per equity share is computed by dividing the net profit/(loss) attributable to the equity holders of the Company by the weighted average numbers of the equity shares outstanding during the period.

Diluted earnings per equity share is computed by dividing the net profit/(loss) attributable to the equity holders of the Company by the weighted average number of equity shares considered for deriving basic earnings per equity share and the weighted average number of equity shares that could have been issued upon conversion of all dilutive potential equity shares.

Diluted earnings per equity share is computed by dividing the net profit attributable to the equity holders of the Company by the weighted average number of equity shares considered for deriving basic earnings per equity share and the weighted average number of equity shares that could have been issued upon conversion of all dilutive potential equity shares. Potential equity shares are deemed to be dilutive only if their conversion to equity shares would decrease the net profit per share from continuing ordinary operations. Potential dilutive equity shares are deemed to be converted as at the beginning of the period, unless they have been issued at a later date.

**v) Common Control Business combination**

Business combinations involving entities that are controlled by the company or ultimately controlled by the same party or parties both before and after the business combination, and where control is not transitory, are accounted for using the pooling of interest's method as follows:

- The assets and liabilities of the transferred entity are recognized at their carrying amounts immediately prior to the transfer.
- No adjustments are made to reflect fair values, or recognize any new assets or liabilities. Adjustments are only made to harmonies accounting policies.
- The identity of the reserves is preserved and the reserves of the transferor division/Company in respect of prior periods is restated as if the business combination had occurred from the beginning of the preceding period in the financial statements, irrespective of the actual date of the combination. However, where the business combination had occurred after that date, the prior period information is restated only from that date.
- The consideration, if any, for the combination may consist of securities, cash or other assets. Securities are recorded at nominal value.
- The difference, if any, between the amount recorded as share capital issued plus any additional consideration in the form of cash or other assets and the amount of share capital (if any) of the transferor shall be transferred to capital reserve and should be presented separately from other capital reserves.

**w) Accounting and reporting information for operating segments**

Ind AS 108 establishes standards for the way that public business enterprises report information about operating segments and related disclosures about products and services, geographic areas, and major customers.

The Company evaluates performance and allocates resources based on an analysis of various performance indicators by business segments.

Accordingly, information has been presented along business segments. The accounting principles used in the preparation of the financial statements are consistently applied to record revenue and expenditure in individual segments and are as set out in the note of significant accounting policies. Revenue for 'all other segments' represents revenue from segments that are not reportable under Ind AS 108.

Operating expenses in relation to segments are categorized based on items that are individually identifiable to that segment, while the remainder of the costs are categorized in relation to the associated turnover of the segment. Certain expenses such as depreciation, which form a significant component of total expenses, are not specifically allocable to specific segments as the underlying services are used interchangeably. The Company believes that it is not practical to provide segment

disclosures relating to those costs and expenses, and accordingly these expenses are separately disclosed as "unallocated" and directly charged against total income.

Assets and liabilities used in the Company's business are not identified to any of the reportable segments, as these are used interchangeably between segments and it is not practicable to provide segment disclosures relating to total assets and liabilities.

Information about geographical areas: The Company derives revenue from customers who have operations in various countries.

#### F. RISK EXPOSURE AND ASSET LIABILITY MATCHING

Provision of a defined benefit scheme poses certain risks, some of which are detailed hereunder, as companies take on uncertain long-term obligations to make future benefit payments.

##### Liability Risks

- **Asset-Liability Mismatch Risk**  
Risk which arises if there is a mismatch in the duration of the assets relative to the liabilities. By matching duration with the defined benefit liabilities, the company is successfully able to neutralize valuation swings caused by interest rate movements. Hence companies are encouraged to adopt asset-liability management.
- **Discount Rate Risk.**  
Variations in the discount rate used to compute the present value of the liabilities may seem small, but in practise can have a significant impact on the defined benefit liabilities.
- **Future Salary Escalation and Inflation Risk**  
Since price inflation and salary growth are linked economically, they are combined for disclosure purposes. Rising salaries will often result in higher future defined benefit payments resulting in a higher present value of liabilities especially unexpected salary increases provided at management's discretion may lead to uncertainties in estimating this increasing risk.

##### Unfunded Plan Risk

This represents unmanaged risk and a growing liability. There is an inherent risk here that the company may default on paying the benefits in adverse circumstances. Funding the plan removes volatility in company's financials and also benefit risk through return on the funds made available for the plan.

**Notes:**

1. Total debts consist of borrowings and lease liabilities.
2. Earnings available for debt services=profit for the year + depreciation, amortization and impairment + finance cost + provision for doubtful debts + share-based payment to employees + non-cash charges.
3. Debt service = Interest + payment for lease liabilities + principal repayments.
4. Credit sales = Total Revenue + opening contract assets - closing contract assets - opening deferred revenue + closing deferred revenue.
5. Earnings before interest and taxes = profit before tax + finance cost - other income
6. Capital Employed = Average tangible net worth + Total debt + Deferred tax.
7. Average is calculated on the basis of opening and closing balances.

**Reasons:**

1. The variance is primarily due to a significant increase in current liabilities, driven by recognition of short-term lease liabilities under Ind AS 116, increased short-term borrowings, higher trade payables, outstanding statutory dues, and customer advances.
2. The debt-equity ratio for the current year is 0.62, whereas it was not applicable in the previous year due to the absence of debt. The variance is due to the introduction of external debt in the current year through new borrowings taken to support business expansion and working capital requirements.
3. The DSCR (Debt Service Coverage Ratio) for the current year is -0.31, while no ratio was reported in the previous year due to the absence of debt. The variance is due to the introduction of new borrowings in the current year, leading to interest and principal repayment obligations, while operating cash flows were insufficient to meet these commitments.
4. The variance is due to a substantial increase in net loss during the year and a simultaneous rise in shareholders' funds, which together led to a deeper negative return on equity.
5. The variance is due to the introduction of credit sales in the current year, resulting in the recognition of trade receivables and the emergence of the Trade Receivables Turnover Ratio.
6. The variance is on account of trade payables being Nil in the previous year. In the current year, normal credit balances with vendors exist, resulting in a meaningful ratio.
7. The variance is due to a significant increase in current liabilities—primarily from lease liabilities, short-term borrowings, and customer advances—exceeding the growth in current assets, resulting in negative net working capital.
8. The variance is due to higher revenue and reduced expenses, resulting in a lower net loss margin compared to the previous year
9. The variance is due to an increase in net loss during the current year, which led to a more negative ratio compared to the previous year.

### INDEPENDENT AUDITORS' REPORT

To  
The Members of

GTT Data Solution Limited (Formerly known as Cinerad Communications Limited)

#### **Report on the Audit of the Consolidated Financial Statements**

##### **Opinion**

We have audited the accompanying consolidated financial statements of GTT data solution limited (Formerly known as Cinerad Communications Limited) (hereinafter referred to as the "Holding Company") and its subsidiaries (Holding Company, and its subsidiaries together referred to as "the Group") which comprise the Consolidated Balance Sheet as at March 31, 2025, and the Consolidated Statement of Profit and Loss including Other Comprehensive Income, the Consolidated Statement of Changes in Equity and the Consolidated Statement of Cash Flows for the year then ended, and notes to the Consolidated Financial Statements, including material accounting policy information and other explanatory information (hereinafter referred to as the "consolidated financial statements").

In our opinion and to the best of our information and according to the explanations given to us, and based on consideration of reports of other auditors on separate / consolidated financial statements of subsidiaries, as were audited by other auditors and unaudited financial information of certain other subsidiaries furnished to us by the management, the aforesaid consolidated financial statements give the information required by the Companies Act, 2013 ("the Act") in the manner so required and give a true and fair view in conformity with the Indian Accounting Standards prescribed under section 133 of the Act read with Companies (Indian Accounting Standards) Rules, 2015, as amended ("Ind AS") and other accounting principles generally accepted in India, of their consolidated state of affairs of the Group as at March 31, 2025, of consolidated loss and other comprehensive income, consolidated changes in equity and its consolidated cash flows for the year then ended.

##### **Basis for Opinion**

We conducted our audit of the consolidated financial statements in accordance with the Standards on Auditing (SAs), as specified under section 143(10) of the Act. Our responsibilities under those SAs are further described in the Auditor's Responsibilities for the Audit of the Consolidated Financial Statements section of our report. We are independent of the Group, in accordance with the ethical requirements that are relevant to our audit of the consolidated financial statements in terms of the Code of Ethics issued by Institute of Chartered Accountant of India ("ICAI"), and the relevant provisions of the Act and we have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained and on consideration of audit reports of other auditors referred to in paragraph (a) of the "Other Matters" section below, is sufficient and appropriate to provide a basis for our opinion.

##### **Key Audit Matters**

Key audit matters are those matters that, in our professional judgement, were of most significance in our audit of the Consolidated financial statements for the year ended March 31, 2025. These matters were addressed in the context of our audit of the Consolidated financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters. We have determined the matters described below to be the key audit matters to be communicated in our report.

**c. Revenue recognition – fixed Price Contract**

The Company engages in fixed price contracts with its customers wherein revenue from such contracts is recognized over time. The Company uses input method to recognise revenue, as it represents efforts expended towards satisfying a performance obligation relative to the total expected efforts or inputs to satisfy the performance obligation.

Contract estimates are formed by the Company considering the following:

- v. Application of the revenue recognition accounting standard is complex. It involves a number of key judgements and estimates. One of the key estimates is total cost-to completion of these contracts. It is used to determine the percentage of completion of the relevant performance obligation.
- vi. There is judgement involved in identification of distinct performance obligations and determination of transaction price for such performance obligations.
- vii. These contracts may involve onerous obligations on the Company requiring critical estimates to be made.
- viii. Contracts are subject to modification to account for changes in contract specification and requirements.

Considering the significant estimate involved in recognition of revenue based on percentage of completion method in respect of fixed price contracts, we have considered this as key audit matter.

How the matter was addressed in our audit.

- iii. Obtained an understanding of the systems, processes and controls implemented by the Group Company and evaluating the design and implementation of internal controls for measuring and recording revenue and the associated contract assets and unearned revenue.
- iv. Tested the design and operating effectiveness of key IT controls over IT environment in which the business systems operate. This includes access controls, program change controls, program development controls and IT operation controls.
- v. For selected samples of contracts, we inspected the terms of the contract and assessed the revenue recognized in accordance with Ind AS by;
  - Evaluating the identification of performance obligations.
  - Agreeing the transaction price to the underlying contracts.
  - Inspecting the approval of the estimates of cost to complete.
  - Assessing the work in progress (contract assets) on the balance sheet date by inspecting the underlying invoices and signed agreements on a sample basis to identify possible delays in achieving milestones. Those may require change in estimated costs to complete the remaining performance obligations.

**d. Assessment of Going Concern**

The Group has incurred significant losses during the year ended March 31, 2025, and its current liabilities exceed its current assets by ₹ 789.52 lakhs. The Parent Company (GD SL) has reported losses, whereas the subsidiaries **GTTPL** and **Itarium** have reported profits. These conditions indicate the existence of a material uncertainty that may cast significant doubt on the Group's ability to continue as a going concern. Management has prepared the financial statements on a going concern basis, based on their assessment of future cash flows and available sources of finance.

**How our audit addressed the Key Audit Matter**

Our audit procedures included, but were not limited to, the following:

- Evaluated the management's assessment of the Group's ability to continue as a going concern, including forecasted cash flows, financing arrangements, and future business plans.

- Assessed the assumptions used in preparing cash flow projections and their consistency with historical performance and current business environment.
- Considered the adequacy of the disclosures made in the consolidated financial statements regarding going concern.

Based on the procedures performed, we considered the management's use of the going concern assumption and related disclosures to be appropriate.

Our opinion is not modified in respect of this matter.

**e. Business combination under Acquisition Method**

During the current financial year, the Group acquired the balance 40% equity interest in **Global Talent Track Private Limited (GTTPL)**, thereby making it a 100% wholly owned step-down subsidiary of the Company, pursuant to a Share Purchase Agreement. The Group has accounted for this acquisition as a **business combination** in accordance with *Ind AS 103 – Business Combinations*, by recognizing certain identifiable assets and liabilities at their fair values.

The measurement of such identifiable assets and liabilities at fair value involves significant management judgement and estimation, including assumptions relating to future cash flows, discount rates, and other valuation inputs. Given the complexity, subjectivity, and magnitude of this acquisition, we considered this to be a key audit matter.

**How our audit addressed the Key Audit Matter**

Our audit procedures included, among others:

- Obtained an understanding of the terms of the Share Purchase Agreement and evaluated whether the acquisition meets the definition of a business combination under *Ind AS 103*.
- Evaluated management's process for identification and recognition of assets acquired and liabilities assumed.
- Assessed the methodology and key assumptions used in determining the fair values of significant assets and liabilities, with the involvement of our valuation specialists were considered necessary.
- Compared key assumptions such as growth rates, discount rates, and projected cash flows against external market data and historical performance of the acquired entity.
- Evaluated the adequacy of disclosures made in the consolidated financial statements with respect to this acquisition.

Based on the procedures performed, we found the accounting treatment and disclosures for the acquisition of GTTPL to be reasonable and appropriate.

## ANNEXURE “A” TO THE INDEPENDENT AUDITOR’S REPORT

### Auditor’s Responsibilities for the Audit of the Consolidated Financial Statements.

As part of an audit in accordance with SAs, we exercise professional judgment and maintain professional scepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the Consolidated financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances. Under section 143(3) (i) of the Act, we are also responsible for expressing our opinion on whether the Company has adequate internal financial controls with reference to Consolidated financial statements in place and the operating effectiveness of such controls.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management and Board of Directors.
- Conclude on the appropriateness of management and Board of Director’s use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company’s ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor’s report to the related disclosures in the Consolidated financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor’s report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the Consolidated financial statements, including the disclosures, and whether the Consolidated financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the Consolidated financial statements for the year ended March 31, 2025, and are therefore, the key audit matters. We describe these matters in our auditor’s report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

## Note

- a. During the previous year, the Group remeasured its previously held **60% controlling interest** in **GTTPL** to fair value at the acquisition date in accordance with *Ind AS 103 – Business Combinations*. The purchase consideration of ₹623.72 lakhs compared with the net identified assets of ₹1,275.55 lakhs and non-controlling interest of ₹510.22 lakhs, resulted in a bargain purchase gain of ₹141.61 lakhs, which has been recognised directly in **Reserves and Surplus** in equity, as required by Ind AS 103.
- b. During the current financial year, the Group further acquired the remaining **40% equity interest**, thereby increasing its stake in GTTPL from 60% to 100%. Since control had already been obtained at the 60% acquisition stage, this subsequent acquisition of additional interest has been accounted for as an **equity transaction with owners** in accordance with **paragraphs 42–43 of Ind AS 103**. Accordingly
  - No additional goodwill or bargain purchase has been recognised on this step acquisition.
  - The difference between the consideration paid for the additional 40% and the carrying amount of the Non-Controlling Interest (NCI) has been adjusted directly in **Retained Earnings under Equity**.
